

# Kicker Ramp Plans

NOW WITH MATERIALS LIST

---

## UPDATE: Bill of Materials Now Included

So, almost two years ago, when I made these plans, I didn't think that anyone would be crazy enough to build these ramps so I didn't spend a lot of time on the plans. Like making a materials list and such. But, as it turns out, there are a lot of you just like me and y'all have been asking for a materials list. I've message some of you with this message:

*"It's so funny... the plans have been up for almost two years and nobody ever asked and just this week I've had tons of requests. I guess I better put it on the actual plans... I think that you would need 5 8' 2x8's but having a sixth one is not a bad idea incase you make a bad cut. Then you will need about 10 8' 2x4's. Everything is put together with 3" deck screws. Hope this helps."*

While I think this might work, it was just a guesstimate that I did in my head one night, this is an actual calculated materials list with a cutting layout for the 2x8's to make the most efficient use of the material. Having said that, I still think that it's a mighty fine idea to buy a piece or two extra of each to save you from having to go back to the store.

Be safe, have fun, and take care of each other,

Cody

Bill of Materials (for both Kicker & Lander)	
Quantity	Size
4	10' 2x8
10	8' 2x4
1 Large Box	3" Exterior Deck Screws
